INTRODUCTION

This Rental and Custom Rate Guide has been prepared by Manitoba Agriculture, Food, and Rural Initiatives to provide information on farm machinery costs, and rental and custom rates for users and owners of farm equipment. The costs and rates are based on average conditions existing in Manitoba in early 2006. The components of each of the rates are shown, so that they can be easily altered in case individual situations differ from those assumed.

These rates are provided as a guideline and should be interpreted and adjusted if necessary for individual situations.

The following conditions and assumptions were used in this guide:

NEW COST OF EQUIPMENT - based on the most recent published list prices less 15% for machines over $100,000; list price less 13.5% for other equipment. Freight costs are assumed to be 1% of new cost for tractors, 1.5% for combines and forage equipment, and 2% for tillage and seeding equipment.

Average sizes shown are based on the above prices. In many cases there is a wide variation in prices for a given size of machine. For example, air seeders may vary plus or minus 30% from the average, depending on the options selected. Where the actual cost of your machine is different for the size shown, the actual cost should be used to determine the appropriate rate.

ANNUAL HOURS OF USE - as shown on each chart.

INTEREST RATE - 4% per annum. This is the investment interest rate. It represents the opportunity cost of owning the equipment.

DEPRECIATION RATES - declining balance method; details given in appendix.

FIXED COSTS - total of interest and depreciation costs, plus 1% of new cost per annum for insurance and housing. Based on the average costs over the life of the machine.

REPAIRS AND MAINTENANCE - based on surveys by American Society of Agricultural Engineers and Manitoba Agriculture, Food, and Rural Initiatives and adjusted for Manitoba Farm Machinery Act warranties where applicable. Includes filters, oil changes, grease, and normal maintenance costs, including labour. Based on the average costs over the life of the machine.

MARGIN (MARKUP) - 15% of (total fixed costs plus repairs and maintenance).

RENTAL RATE - total of fixed costs, repairs and maintenance, and margin.

FUEL COST - based on average fuel consumption from Nebraska Tractor Tests (tractors) and PAMI tests(other self-propelled equipment). A diesel fuel price of $0.72/L and a gasoline price of $0.75/L is assumed for 2006.

LABOUR COST- as shown on each chart.

CUSTOM RATE - total of rental rate, fuel cost and labour cost.

NOTE: All above costs are based on the averages over the life of the machine - assumed to be 15 years.The rental and custom rates shown are therefore low for machines less than 6 years old and high for machines older than 7 years.

NOTES and CALCULATIONS

TYPICAL COSTS PER ACRE

	SPEED	MACHINE SIZE or TYPE	RENTAL RATE	CUSTOM RATE
Balers				
(round bales - 15/hr)		6'(dia.) x 5'(wide)	$2.50 - $3.70/bale plus twine	$5.00 - $7.00/bale plus twine
(square bales - 200/hr)		14" x 18"	$0.13- $0.18/bale plus twine	$0.29 -$0.35/bale plus twine
(large sq. bales - 40/hr)		31.5" x 34"	$2.50 - $3.75/bale plus twine	$4.50 -$6.50/bale plus twine
Bale pickup				
(SP square bale wagon)		160 bales	$0.22 - $0.27/bale	$0.29 - $0.36/bale
(PT round bale wagon)		14 bales	$0.90 - $1.25/bale	$2.50 - $3.75/bale
(6 km round trip)				
Combine (SP)				
(Wheat @ 45 bu/ac.)	3 - 5 mph	25 ft.	$14.00 - $18.00/ac	$16.00 - $20.00/ac
Cultivator				
(first operation)	4 - 5 mph	40 ft.	$1.30 - $1.60/ac	$4.50 - $6.00/ac
(secondary operations)	4.5 - 5.5 mph	40 ft.	$1.10 - $1.40/ac	$3.75 - $5.25/ac
Grain truck				
(20 mile round trip)	35 - 50 mph	600 bu.	$.0025-.0029/bu/mile	$.0045-.0050/bu/mile
(60 mile round trip)		600 bu.	$.0020-.0025/bu/mile	$.0035-.0040/bu/mile
Harrows	5.5 - 7 mph	80 ft.	$0.45 - $0.55/ac	$2.00 - $2.50/ac
Mower conditioner	4 - 6 mph	14 ft.	$5.25 - $6.00/ac	$8.50 - $10.00/ac
Seeders				
(air seeder)	4 - 5 mph	40 ft.	$4.75 - $6.00/ac	$7.75 - $9.75/ac
(air drill)	4 - 5 mph	40 ft.	$6.00 -$7.25/ac	$10.00 - $12.50/ac
(drill)	4 - 5 mph	40 ft.	$4.00 - $5.25/ac	$7.00 - $8.50/ac
Sprayers				
(Pull type)	5 - 8 mph	100 ft.	$1.75 - $2.25/ac	$3.50 - $3.75/ac
(Self-Propelled)	12-15 mph	80 ft	$2.50 - $3.25/ac.	$3.75 - $4.25/ac.
Tractors	4 - 7 mph	2WD	$0.19 - $0.22/hphr.	add $0.11 - 0.13/hphr.
		FWA	$0.23 - $0.26/hphr.	for fuel and $10/h
		4WD	$0.18 - $0.21/hphr.	for labour
Windrower (PTO)	4 - 5.5 mph	25 ft.	$2.25 - $3.00/ac	$4.50 - $5.25/ac
Windrower (SP)	4 - 5.5 mph	25 ft.	$6.50- $7.75/ac	$8.00 - $9.50/ac

		600	16.41	6.90	3.50	26.80	15.84	10.00	52.64

Notes: If tractor rating is given in net engine power, multiply by 0.88 to get PTO power
Asterisks * indicate tractors without cabs but with ROPS.
If your tractor size and the new cost indicated don't agree, use the actual new cost.

		200	34.64	12.00	7.00	53.63	3.60	10.00	67.23	

New Cost should include dryer and associated grain handling equipment. Wet/dry surge and cooling bins should not be included.

*Power costs include hydro costs for dryer operation. If tractor driven, use tractor cost (plus fuel) and hydro costs for load/unload augers.

Propane Costs:

**Propane costs will vary greatly depending upon ambient air temperature, drying temperature, grain type, moisture removed, dryer type,etc.

Actual propane consumption should be used in determining costs. For approximate costs, use chart below with appropriate ambient temperature correction factor. Costs assume propane at $0.40 per litre and a drying air temperature of 65 degrees C.

	2.5% moisture removal	5.5% moisture removal
Wheat/Barley	$0.07 per bu.(w.b.)*	$0.12 per bu.(w.b.)*
Oilseeds	$0.05 per bu.(w.b.)*	$0.09 per bu.(w.b.)*

*wet bushels

Note: Costs shown assume an ambient air temperatures of 15 degrees C.

For lower ambient air temperatures, multiply propane cost by the following factors:

15 degrees C = 1.0

-7 degrees C = 1.5

-30 degrees C = 2.0

Sample calculation shown in Appendix, page 33.

	27000	0.56	0.43	0.15	1.13	0.63	0.11	1.87		

Note: Fuel costs are for diesel engines. For gasoline engines multiply fuel costs by 1.55.
Use standby charges when trucks costing $95,000 or less are used less than 60 km per day; trucks costing $105,000 to $145,000 are used less than 75 km per day ; or trucks costing $145,000 or more are used less than 100 km per day. Standby charges are based on fixed cost of ownership for 200 days per year. Adjust upwards if shorter periods of use per year are assumed.

Average costs: (net payload in brackets)

single axle with grain box (9 t) $45,000 to $65,000
tandem axle with grain box (16 t) $85,000 to $110,000
truck tractor with grain trailer (23 t) $125,000 to $140,000
truck tractor with grain trailer (40 t) $130,000 to $160,000

APPENDIX

1) Depreciation and Interest Rate Calculations:

Depreciation Rates

	1st year	all other years	remaining value after 15 years
Tractors	15%	12.0%	14.2%
Trucks, tillage and harvesting equip.	18%	14.4%	9.3%
Hay and forage equipment	20%	16.0%	7.0%

Interest costs are based on the average value of the machine over a 15 year life, using annual depreciated values calculated from the above rates. The interest costs are calculated using the beginning value for each year. (see Table below).

Depreciation and Interest Cost Table for $100,000 tractor (interest rate 4%)

Year	Depreciation rate	Depreciation	Value	Interest
0	15%		$100,000	
1	12%	$15,000	$85,000	$4,000
2	12%	$10,200	$74,800	$3,400
3	12%	$8,976	$65,824	$2,992
4	12%	$7,899	$57,925	$2,633
5	12%	$6,951	$50,974	$2,317
6	12%	$6,117	$44,857	$2,039
7	12%	$5,383	$39,474	$1,794
8	12%	$4,737	$34,737	$1,579
9	12%	$4,168	$30,569	$1,389
10	12%	$3,668	$26,901	$1,223
11	12%	$3,228	$23,673	$1,076
12	12%	$2,841	$20,832	$947
13	12%	$2,500	$18,332	$833
14	12%	$2,200	$16,132	$733
15	12%	$1,936	$14,196	$645
	15 year average	$5,720	$46,002	$1,840

Example: Tractor costing $100,000 new. Average annual depreciation for 15 year life is $5720. Average annual interest cost at 4% interest rate is $1840.

Hourly depreciation at 450 hours/year	$5720/450=	$12.71 per hour
Hourly interest cost :	$1840/450=	$4.09 per hour
Insurance and housing cost is 1%/yr	$1000/450=	$2.22 per hour
Total fixed costs:		**$19.02** per hour

2) Grain Drying Example: Stationary Batch(250 bu.),$50,000, 150 hr./yr, Wheat from 17% to 14.5% Ambient Temp. of -7 degrees C, Drying rate of 200 bu./hr.

Custom Rate: (from Table on Page 21)	$54.07 per hour
Propane Cost: $0.07/bu. x 1.5 x 200 bu./hr.=	$21.00 per hour
Total Custom Rate -	**$75.07** per hour

3) Chart Formulas (pages 34 and 35):

Cost per hectare or acre = $\frac{\text{cost per hour}}{\text{hectares or acres per hour}}$

Hectares per hour = $\frac{\text{width in metres x speed in km/h x \% efficiency}}{10.0}$

Acres per hour = $\frac{\text{width in feet x speed in mph x \% efficiency}}{8.25}$

Note: (80% field efficiency is assumed in the charts)

To determine the cost or rate per hectare, acre, or bale, use the charts provided on the last two pages.

Example No. 1. Combine custom rate is $150/h; the combine covers 9 acres per hour. Cost per acre would be $16.67 (from chart on page 34).

Example No. 2. Seeding with an air seeder. The rental rate for the air seeder is $85/h and the tractor custom rate is $45/h. The total hourly rate = $130/h. The work rate is 8 ha/h. Rate per hectare = $16.25 (from chart on page 34).

Example No. 3. Baler making 14 bales per hour. Baler rental rate = $33/h. Tractor custom rate is $23/h. Total hourly rate = $56/h plus twine. Cost per bale = $4.00 plus twine. (from chart on page 35).
